

JavaScript Math Object - Practice Tasks

Level 1: Basic Tasks

1. Print the absolute value of -45.
2. Find the square root of 144.
3. Find 5 raised to the power of 3.
4. Round 6.2 using Math.ceil().
5. Round 8.9 using Math.floor().
6. Round 4.6 using Math.round().
7. Remove the decimal part from 12.99 using Math.trunc().
8. Find the largest number among 12, 55, 90, 23, 44.
9. Find the smallest number among 10, 5, 18, 25.
10. Find the sign of -50, 0, and 100 using Math.sign().

Level 2: Practice Tasks

11. Generate a random number between 1 and 10.
12. Generate a random number between 50 and 100.
13. Find the cube roots of 64, 125, and 216.
14. Find $\sin(90^\circ)$, $\cos(0^\circ)$, and $\tan(45^\circ)$. (Convert degrees to radians.)
15. Use Math.fround() with 5.678912345 and observe the result.

Level 3: Real-Life Tasks

16. Given marks = [55, 78, 90, 45, 67], find the highest and lowest marks.
17. Calculate the area of a circle with radius = 7 using Math.PI.
18. Round 145.8 electricity units up using Math.ceil().
19. Display the absolute value of -25000.
20. Create a dice simulator that generates a random number between 1 and 6.

Level 4: Challenge Tasks

21. Generate and display a random number between 1 and 100.
22. Generate a random 6-digit OTP.
23. For temp = -18.5, display absolute, rounded, and truncated values.
24. For price = 499.99, display rounded, rounded-up, and rounded-down values.
25. Using a = 15 and b = 4, display a^2 , b^2 , $\sqrt{a}$, $\sqrt{b}$, maximum, minimum, and a random integer between them.

Mini Projects

1. Random Background Color Generator
2. Dice Rolling Game

3. Coin Toss Game (Heads/Tails)
4. Lucky Number Generator (1–100)
5. Number Guessing Game (1–100)
